Group 5: Milestone 3

Sahil Sinha
Anant Patel
Aadil Shekh
Suraj Narang

Accomplishments:

- Created a homepage to get started
    - Redirects the user to a different page
- Added buttons into the UI
    - Home page, location page, etc.
    - Add preferences button
- Able to retrieve the user's current location

Next Goals:
- Work on requesting permission before retrieval of user coordinates (lat., long.) before proceeding to the starting page
- Figure out how to connect to the Yelp API in order to retrieve food items based on selected user preferences.
- Show all restaurant info (contact info, ratings, hours of business)

Here is what the current starting UI looks like:

Here is a glimpse of the starting home page, with a "Get Started" button:
